

# 8x8<sup>®</sup>

# Unbox new possibilities

We are revolutionising how partners engage with 8x8!

Our new self-serve model lets you mix and match our product components, so you only buy the features your customers need.

Pay for what you use. Goodbye fixed contracts. Hello flexibility.

[Find out more](#)

## Buy what you need, sell it how you like:

- Save money
- Save time
- Sell more quickly
- Adapt with your customers
- And most importantly, stay ahead of the game

## Good for you...

You'll find everything you need in one place, with our new self-serve partner portal. It's simple to use and easy to understand. Sign-up is a breeze with automated training and onboarding, so you can get selling more quickly.

And with revenue tracking and analytics to help you manage your progress, you'll always stay in control. You only pay for what you use and can bill how you choose, so it's tailored to your customers exact needs.

While you'll be managing your own customers, you'll never be on your own. You'll have access to our training programs, support and knowhow along the way, with a team that is dedicated to your success.

## And good for your customers too

You build the solution around them, which is specific to their needs. So they get a solution that fits like a glove.

And if their business needs change? No problem. You can change and flex their 8x8 solution too. No tie in. No fuss.

## How does it work?

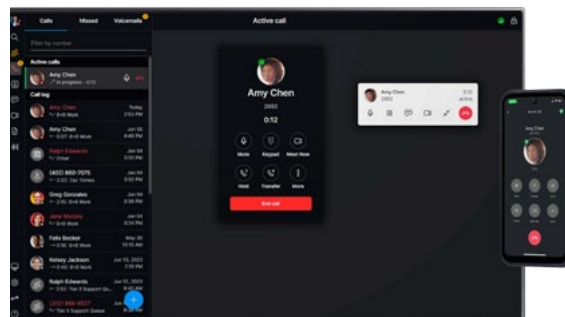

Just select the solution components your customer needs from the partner portal. Place an order and configure the system.

Billing starts when its used. And stops when its not. Simple. Easy. Flexible.
